

NETWORKS

Serving all electricity customers

LOOK UP, IT COULD SAVE YOUR LIFE

Making contact with overhead electricity wires or even coming close puts you at serious risk of injury or death from electrocution when harvesting.

- The majority of accidents occur through failure to notice the overhead power lines.
- Always take sensible precautions when harvesting cereal crops.
- Electricity can jump gaps so even coming close puts you at serious risk.
- Overhead power lines can be difficult to see in sunlight or at dusk.

Phone immediately **1850 372 999** (24 hour/7 day service).
